Blackbox TV Xtreme

Install Xtreme on Your Firestick

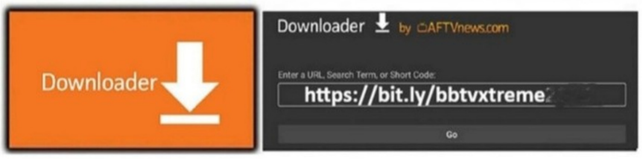

Once this app is installed, please delete any old Blackbox app
(Locate it, Arrow down to it, Click Menu(☰) button and click Uninstall)

1. Start off making sure your settings are correct. Click Home button on the remote. Scroll over to Settings(click it). Arrow over to My Fire TV(click it) then go into Developer Options. {If you don't see Developer Options, move down to the next section.
If you do have Developer Options(click it). Arrow down to and turn both ADB Debugging and Unknown Sources to On(Click them)

If your Developers Options is missing. Follow these Steps

Click Home on the remote. Arrow down to the row with your apps, then over to Settings{Gear}Click it. Then arrow down and click My Fire Tv. Next click About, and on the next screen you will be on Fire Tv Stick. Click the center button 7 times and it will say, {You are now in Developer Mode}. Click back button and now Developer Options is there. Click and turn both options to ON. Now you can drop down to the next step.

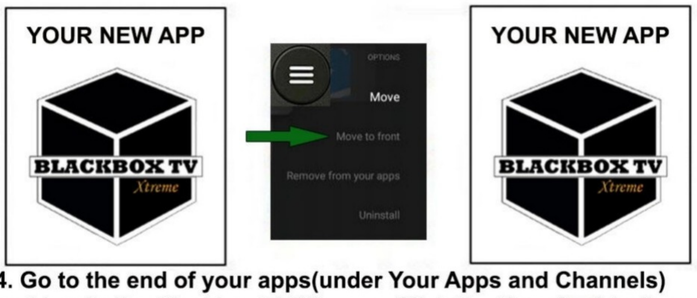

2. Click the Home button on remote. Arrow down to row with apps and look for Downloader. If you don't see it, arrow over to the end of the row and click on the 3 boxes with the plus symbol. This will show all of your apps. Look and see if you have a box like the orange one below in your apps list. If yes, click and open it. If not, click Home on remote, Arrow over and click the Mag Glass, down and click Search; type in box; Downloader. When it appears, click on it and click Install. Once installed click Open. Arrow over to the left column and click on Settings. Make sure all of the boxes are checked. Arrow back over to the box says http:// and input the below link and click GO to install the app.

Where it displays, Enter a URL, type: bit.ly/bbtvxtreme

3. If typed correctly, it will change over to a page where you will see the app downloading. On the pop-up, Arrow over and click on the Install box. Once it is finished installing, Click on Done, then Delete and Delete again. Now, click on the Home(House) Button on the remote to take you back to the Home page. Next, we will locate the Blackbox Xtreme app, you just installed.

If you get a WHITE SCREEN that don't change over, scroll over to Settings in this Downloader app, and check Enable Javascript then go re-enter the above.

4. Go to the end of your apps(under Your Apps and Channels) and locate the Blackbox TV Xtreme. Click the Menu(☰) button on the remote, Arrow down to Move to Front(click it). It will move the app to the front of your list. Arrow over and click on the app.

STOP-Retrieve your login info to complete the next steps

5. When the screen opens, arrow down and BBTV Xtreme(click it). Click Access token; input your given Token, and click the Check when done. Click Apply. Give it Time to load. When finished; Go to the left Menu bar and click Refresh(↻). Click Close and then back when you see OK. Now go down to Settings(⚙). Move to the down to EPG teleguide(click it).TV Guide now. loaded.

6. Favorites. Move to the Search icon(🔍)click it. Type a close BIG city in the search, click Mag Glass(🔍) when done. Arrow down to each one. Hold center button down, on pop-up, click Add to Favorites. Click back. Arrow over and up to the Network Tv Folder. Same process. Pick your top channels;Hold down Center button and click Add to Favorites. Try all folders, and add all your Favs.

7. Backup Media link. Until we load all movies and locals you will need your backup(old channels). Go back to the Xtreme Main Menu(Live Stream, TV Guide, Media)page. Click on Settings(⚙), then Account Setup, and click BBTVNEONS. Click Login and input your Username, click ✓then Apply. Arrow down and click Password. Input it, click ✓ then Apply. Arrow down to confirm your login info, by clicking Apply. Your backup Channels are now added. Use the above Blue Text to Update your Channels & EPG (TV Guide), or Green Text to add more Favorites if needed. Use your icons to find your media. I will list them below as a reference.
