

VLC Player Installation

Want a smoother, tv watching Experience with as less buffering as possible. Load the VLC Player. Instructions are below.

1. Click home button on remote and do a SEARCH for VLC player. It will be the one with the orange and white cone. Download and install it, until it says open. Open it one time to be sure it installed.
2. Go back to the Blackbox Neons app and open it. From the Blackbox Main Menu Page, go up to top right and click on Settings(gear icon).
3. Click on Player Selection. Then click on +Add Player. Arrow down and click on VLC player. On the pop-up choose ADD.
4. Go back to select your Media Player. Arrow down to each option and click to the Box. Change every box to VLC player.
5. Once all boxes are changed, click Back at the very bottom.
6. Keep hitting the back button until you get to Blackbox Main Menu screen. Go into Live TV., press Menu(3 lines) on remote and Refresh Channels. Then hit the back button, and repeat to refresh TV guide.
7. Go back to Live TV. and you should be good to go. This player seems to help with buffering and playing some movies a lot better.

Thanks for your business.
